JOURNAL POLICIES

1. ETHICAL APPROVAL

All research involving human participants, human data, animals, or identifiable biological materials must comply with applicable ethical standards and institutional requirements. Authors must provide the name of the approving ethics committee/institution and approval or reference number, where applicable.

2. INFORMED CONSENT

Written informed consent must be obtained from participants when required. For case reports or identifiable images/data, appropriate consent for publication must be obtained. Authors should confirm this in the manuscript.

3. ORIGINALITY AND DUPLICATE PUBLICATION

Manuscripts must be original and must not have been published previously or be under consideration by another journal. Authors must disclose any substantially similar manuscripts, preprints, conference papers, or related publications.

4. PLAGIARISM AND RESEARCH INTEGRITY

All submissions may be screened for plagiarism, duplicate publication, image manipulation, fabricated or falsified data, and other forms of research misconduct. Authors are responsible for the accuracy and integrity of their submitted work.

5. AUTHORSHIP AND CONTRIBUTIONS

Authorship must be based on substantial contributions to the work. All listed authors must approve the final manuscript and accept responsibility for their contributions. Author contributions should be clearly stated.

6. CONFLICTS OF INTEREST

All authors must disclose financial, professional, personal, institutional, or other relationships that could influence the research or its interpretation. If no conflicts exist, authors should explicitly state this.

7. FUNDING AND SPONSORSHIP

All sources of financial or material support must be declared, including grant numbers where applicable. The role of the funding organization in study design, data collection, analysis, interpretation, and manuscript preparation should be stated.

8. DATA AVAILABILITY AND TRANSPARENCY

Authors should provide a clear data availability statement. Where appropriate and ethically permissible, supporting datasets, protocols, analytical code, or supplementary materials should be made available through suitable repositories.

9. HUMAN AND ANIMAL RESEARCH

Research involving humans or animals must comply with applicable international, national, and institutional regulations. Appropriate reporting guidelines should be followed, such as **CONSORT, STROBE, PRISMA, CARE, ARRIVE**, or other relevant standards.

10. AI AND TECHNOLOGY USE

Authors must disclose the use of artificial intelligence or AI-assisted tools in manuscript preparation, analysis, image generation, or other research activities when required by journal policy. AI tools must not be listed as authors, and authors remain fully responsible for the submitted content.

11. COPYRIGHT AND PERMISSIONS

Authors must obtain permission to reproduce copyrighted material, including previously published figures, tables, photographs, and substantial text. Appropriate attribution must be provided.

12. PEER REVIEW AND CONFIDENTIALITY

Manuscripts are subject to confidential peer review. Reviewers must maintain confidentiality, declare conflicts of interest, and provide objective, constructive, and evidence-based assessments. Manuscripts and unpublished information must not be used for personal advantage.

13. CORRECTIONS, RETRACTIONS, AND POST-PUBLICATION ISSUES

The journal may publish corrections, expressions of concern, or retractions when necessary to maintain the integrity of the scholarly record. Authors must cooperate with investigations concerning potential errors or research misconduct.

14. DECLARATION OF RESPONSIBILITY

Submission of a manuscript confirms that the authors have reviewed and approved the manuscript, complied with applicable ethical and publication requirements, and accept responsibility for the accuracy and integrity of the work.
